In the specification on page 1, line 2, --which is not U.S. Patent 6,776,449,--has been inserted after "October 28, 2002,".

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: in Figure 1, reference number "2" has been added to the right-hand-most side of the figure to correspond with the appropriate lead line.

Also in the specification, the abstract has been rewritten as follows:

-- A vehicle door which can be used as a tailgate ~~[or a side door of a vehicle and a manufacturing method of this vehicle door is provided. A tailgate (1) which is a vehicle door]~~ is formed of an outer panel (2) on an outer side of a vehicle, an inner panel (3) on an inner side of the vehicle, and a module plate (4) to which door parts such as a wiper motor (18) are attached, and a lining (6). The inner panel (3) is in a frame shape with only a marginal portion (10) of the whole periphery left and with an opening (11) formed therein, ~~[, which results in reduction in the weight of the tailgate (1).]~~ The module plate (4) ~~[which also]~~ serves as a reinforcing member and is composed of a first extending portion (13) extending in a right and left direction and a second extending portion (14) extending downward from the first extending portion (13) to be in a substantially T-shape, ~~[, which also results in reduction in the weight of the module plate (4), and connection]~~ Connection of the module plate (4) to the outer panel (2) and the inner panel (3) reinforces the tailgate (1).--
